# Chapter 1

## Hierarchical Index

### 1.1 Class Hierarchy

This inheritance list is sorted roughly, but not completely, alphabetically:

QGraphicsPixmapItem	
game2 . . . . .	11
left_disks . . . . .	15
leftbutton . . . . .	16
mid_disks . . . . .	18
midbutton . . . . .	19
right_disks . . . . .	20
rightbutton . . . . .	21
QGraphicsScene	
game2 . . . . .	11
QObject	
left_disks . . . . .	15
leftbutton . . . . .	16
mid_disks . . . . .	18
midbutton . . . . .	19
right_disks . . . . .	20
rightbutton . . . . .	21
QWidget	
battleship . . . . .	7
BattleShip_Main_Menu . . . . .	11
game2_main_menu . . . . .	13
historypanel . . . . .	14
loginPanel . . . . .	16
lose_screen . . . . .	17
mainpanel . . . . .	17
question_tab . . . . .	19
signup_form . . . . .	21
victory_screen . . . . .	23
welcome_screen . . . . .	23

## Chapter 2

# Class Index

### 2.1 Class List

Here are the classes, structs, unions and interfaces with brief descriptions:

battleship	7
Battleship_Main_Menu	11
game2	11
game2_main_menu	13
historypanel	14
left_disks	15
leftbutton	16
loginPanel	16
lose_screen	17
mainpanel	17
mid_disks	18
midbutton	19
question_tab	19
right_disks	20
rightbutton	21
signup_form	21
victory_screen	23
welcome_screen	23

## Chapter 3

# File Index

### 3.1 File List

Here is a list of all documented files with brief descriptions:

<a href="#">battleship.cpp</a>	
Battleship . . . . .	25
<a href="#">battleship.h</a>	
Battleship class . . . . .	26
<a href="#">battleship_main_menu.cpp</a>	
Battleship main menu . . . . .	26
<a href="#">battleship_main_menu.h</a>	
Battleship main menu class . . . . .	27
<a href="#">extern_vars.h</a>	
Extern_vars class . . . . .	27
<a href="#">game2.cpp</a>	
Game2 . . . . .	28
<a href="#">game2.h</a>	
Game2 class . . . . .	30
<a href="#">game2_main_menu.cpp</a>	
Game2 main menu . . . . .	30
<a href="#">game2_main_menu.h</a>	
Game2 main meenu class . . . . .	31
<a href="#">historypanel.cpp</a>	
User game history implementation . . . . .	31
<a href="#">historypanel.h</a>	
User game history . . . . .	32
<a href="#">left_disks.cpp</a>	
Left discs . . . . .	32
<a href="#">left_disks.h</a>	
Left discs class . . . . .	33
<a href="#">leftbutton.cpp</a>	
Leftbutton . . . . .	33
<a href="#">leftbutton.h</a>	
Leftbutton class . . . . .	34
<a href="#">loginpanel.cpp</a>	
Implementation of login menu . . . . .	34
<a href="#">loginpanel.h</a>	
Loginpanel header class . . . . .	35
<a href="#">lose_screen.cpp</a>	
Lose screen implementation of lose screen class . . . . .	35

<a href="#">lose_screen.h</a>	
Lose_screen class . . . . .	36
<a href="#">mainpanel.cpp</a>	
Mainpanel . . . . .	36
<a href="#">mainpanel.h</a>	
Mainpanel header class . . . . .	37
<a href="#">mid_disks.cpp</a>	
Mid discs . . . . .	37
<a href="#">mid_disks.h</a>	
Mid discs class . . . . .	38
<a href="#">midbutton.cpp</a>	
Midbutton . . . . .	38
<a href="#">midbutton.h</a>	
Midbutton class . . . . .	39
<b>question_tab.h</b> . . . . .	<b>??</b>
<a href="#">right_disks.h</a>	
Right discs class . . . . .	39
<a href="#">rightbutton.h</a>	
Rightbutton class . . . . .	40
<a href="#">signup_form.cpp</a>	
Signup_form . . . . .	40
<a href="#">signup_form.h</a>	
For registering new users . . . . .	41
<a href="#">victory_screen.cpp</a>	
Victory screen . . . . .	41
<a href="#">victory_screen.h</a>	
Victory screen class . . . . .	42
<a href="#">welcome_screen.cpp</a>	
Screen that shows when user logs in . . . . .	42
<a href="#">welcome_screen.h</a>	
Header file for <a href="#">welcome_screen.cpp</a> . . . . .	43

## Chapter 4

# Class Documentation

### 4.1 battleship Class Reference

Inheritance diagram for battleship:

Collaboration diagram for battleship:

## Public Slots

- bool [open\\_question\\_tab](#) ()  
*Function that opens a question tab when a player clicks on a button.*
- void [showShip00](#) ()  
*Function that checks if a ship is under a pushbutton.*
- void **showShip01** ()
- void **showShip02** ()
- void **showShip03** ()
- void **showShip10** ()
- void **showShip11** ()
- void **showShip12** ()
- void **showShip13** ()
- void **showShip20** ()
- void **showShip21** ()
- void **showShip22** ()
- void **showShip23** ()
- void **showShip30** ()
- void **showShip31** ()
- void **showShip32** ()
- void **showShip33** ()
- void [updateTimer](#) ()  
*Function for updating the timer.*

## Public Member Functions

- [battleship](#) (QWidget \*parent=nullptr)
- void [checkCounters](#) ()  
*Function that checks if a pushbutton has been clicked.*
- void [getUser](#) (QString)  
*Function that gets the username.*
- void [saveScore](#) (QString player, int correct, int incorrect)  
*Function that saves the user's score.*

## Public Attributes

- QTime \* [timer](#)  
*timer for game duration*
- QTimer \* [timerDecrement](#)  
*for decrementing timer*
- QLabel \* **decrement**
- QString **game\_username**
- QGridLayout \* **screen**
- QGridLayout \* [goodpractices](#)  
*Grid for the player's side.*
- QGridLayout \* [badpractices](#)  
*Grid for the enemy's side.*
- QPushButton \* [bad00](#)  
*badxy: PushButton for enemy's side*
- QPushButton \* **bad01**
- QPushButton \* **bad02**

- QPushButton \* **bad03**
- QPushButton \* **bad10**
- QPushButton \* **bad11**
- QPushButton \* **bad12**
- QPushButton \* **bad13**
- QPushButton \* **bad20**
- QPushButton \* **bad21**
- QPushButton \* **bad22**
- QPushButton \* **bad23**
- QPushButton \* **bad30**
- QPushButton \* **bad31**
- QPushButton \* **bad32**
- QPushButton \* **bad33**
- QPushButton \* [gd00](#)

*gdxxy QPushButton for player's side*

- QPushButton \* **gd01**
- QPushButton \* **gd02**
- QPushButton \* **gd03**
- QPushButton \* **gd10**
- QPushButton \* **gd11**
- QPushButton \* **gd12**
- QPushButton \* **gd13**
- QPushButton \* **gd20**
- QPushButton \* **gd21**
- QPushButton \* **gd22**
- QPushButton \* **gd23**
- QPushButton \* **gd30**
- QPushButton \* **gd31**
- QPushButton \* **gd32**
- QPushButton \* **gd33**
- QGridLayout \* [grid](#)

*Main grid.*

- QLabel \* **question**

## 4.1.1 Constructor & Destructor Documentation

### 4.1.1.1 battleship()

```
battleship::battleship (
    QWidget * parent = nullptr ) [explicit]
```

"home/eece435l/435-project-group7/Lebanon.png"

## 4.1.2 Member Function Documentation

#### 4.1.2.1 checkCounters()

```
void battleship::checkCounters ( )
```

Function that checks if a pushbutton has been clicked.

This function disables a push button after it's been clicked once

#### 4.1.2.2 getUser()

```
void battleship::getUser (
    QString username )
```

Function that gets the username.

#### 4.1.2.3 open\_question\_tab

```
bool battleship::open_question_tab ( ) [slot]
```

Function that opens a question tab when a player clicks on a button.

##### Returns

bool to be indicate whether the question tab was opened or not

This function randomly picks a question along with its respective answers

It displays the question along with the answers using a QInputDialogue

#### 4.1.2.4 saveScore()

```
void battleship::saveScore (
    QString player,
    int correct,
    int incorrect )
```

Function that saves the user's score.

##### Parameters

<i>player</i>	username of player
<i>correct</i>	number of correct answers
<i>incorrect</i>	number of incorrect answers

This function checks the json file to find the user

It then increments the wins/losses member for the user

#### 4.1.2.5 showShip00

```
void battleship::showShip00 ( ) [slot]
```

Function that checks if a ship is under a pushbutton.

This function checks if a ship image is under a pushbutton

If there is a ship image, it'll display an explosion (hit) if the player answers correctly

If the player answers incorrectly, the ship image is shown and a random ship on the player's side is hit

#### 4.1.2.6 updateTimer

```
void battleship::updateTimer ( ) [slot]
```

Function for updating the timer.

This function updates the 10 minute timer and displays it on screen

The documentation for this class was generated from the following files:

- [battleship.h](#)
- [battleship.cpp](#)

## 4.2 Battleship\_Main\_Menu Class Reference

Inheritance diagram for Battleship\_Main\_Menu:

Collaboration diagram for Battleship\_Main\_Menu:

## Public Member Functions

- **Battleship\_Main\_Menu** (QWidget \*parent=nullptr)
- void [to\\_new\\_window\\_key\\_click](#) (QKeyEvent \*event)  
*Function that takes the user to the battleship game when they click F1 key.*
- void [getUser](#) (QString username)  
*Function that retrieves the name of the user.*

## Public Attributes

- QString **menu\_username**

### 4.2.1 Member Function Documentation

#### 4.2.1.1 [getUser\(\)](#)

```
void Battleship_Main_Menu::getUser (
    QString username )
```

Function that retrieves the name of the user.

#### Parameters

<i>username</i>	
-----------------	--

The documentation for this class was generated from the following files:

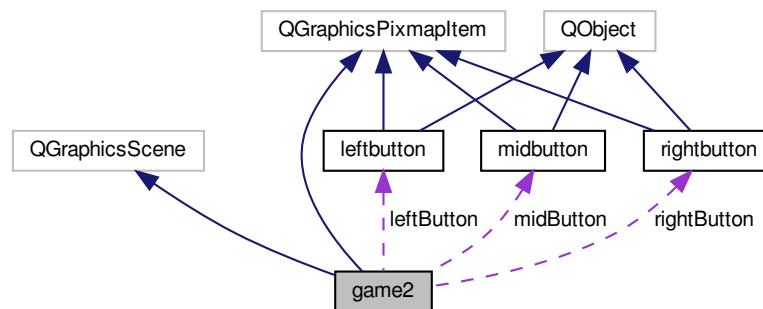

- [battleship\\_main\\_menu.h](#)
- [battleship\\_main\\_menu.cpp](#)

## 4.3 game2 Class Reference

Inheritance diagram for game2:

Collaboration diagram for game2:

## Public Slots

- void `create_left` ()  
*Function that creates discs in the left lane.*
- void `create_mid` ()  
*Function that creates discs in the middle lane.*
- void `create_right` ()  
*Function that creates discs in the right lane.*
- void `checkMisses` ()  
*Function that checks number of missed disks.*

## Public Member Functions

- **game2** (QGraphicsScene \*parent=nullptr)
- void **keyPressEvent** (QKeyEvent \*event)

## Public Attributes

- QLabel \* `counter_label`  
*Label to keep track of total score and display it.*
- QGridLayout \* `background`  
*Background of the game.*
- `leftbutton` \* **leftButton**
- `rightbutton` \* **rightButton**
- `midbutton` \* **midButton**
- QGraphicsView \* `view`  
*Graphics View.*

### 4.3.1 Member Function Documentation

#### 4.3.1.1 checkMisses

```
void game2::checkMisses ( ) [slot]
```

Function that checks number of missed disks.

Checks if number of missed disks is 3 to end the game

#### 4.3.1.2 create\_left

```
void game2::create_left ( ) [slot]
```

Function that creates discs in the left lane.

This function creates discs in the left lane

It adjusts the speed at which the discs are created based on the score of the player

It starts at 1x speed, increases to 2x, then to 8x

#### 4.3.1.3 create\_mid

```
void game2::create_mid ( ) [slot]
```

Function that creates discs in the middle lane.

This function creates discs in the middle lane

It adjusts the speed at which the discs are created based on the score of the player

It starts at 1x speed, increases to 2x, then to 8x

#### 4.3.1.4 create\_right

```
void game2::create_right ( ) [slot]
```

Function that creates discs in the right lane.

This function creates discs in the right lane

It adjusts the speed at which the discs are created based on the score of the player

It starts at 1x speed, increases to 2x, then to 8x

The documentation for this class was generated from the following files:

- [game2.h](#)
- [game2.cpp](#)

## 4.4 game2\_main\_menu Class Reference

Inheritance diagram for game2\_main\_menu:

Collaboration diagram for game2\_main\_menu:

### Public Member Functions

- **game2\_main\_menu** (QWidget \*parent=nullptr)
- void **getUser** (QString username)

*Function that retrieves username.*

### Public Attributes

- QGridLayout \* **main\_menu**  
*Grid for the main menu.*
- QPushButton \* **start**  
*Start button.*
- QString **menu\_username**

#### 4.4.1 Member Function Documentation

#### 4.4.1.1 getUser()

```
void game2_main_menu::getUser (
    QString username )
```

Function that retrieve username.

The documentation for this class was generated from the following files:

- [game2\\_main\\_menu.h](#)
- [game2\\_main\\_menu.cpp](#)

## 4.5 historypanel Class Reference

Inheritance diagram for historypanel:

Collaboration diagram for historypanel:

### Public Slots

- void [back](#) ()  
*function to go back to previous panel*

### Public Member Functions

- **historypanel** (QWidget \*parent=nullptr)
- void **getHistory** (QString)

The documentation for this class was generated from the following files:

- [historypanel.h](#)
- [historypanel.cpp](#)

## 4.6 left\_disks Class Reference

Inheritance diagram for left\_disks:

Collaboration diagram for left\_disks:

### Public Slots

- void **update** ()  
*Function that updates the position of left discs.*

## Public Member Functions

- **left\_disks** (QObject \*parent=0)

### 4.6.1 Member Function Documentation

#### 4.6.1.1 update

```
void left_disks::update ( ) [slot]
```

Function that updates the position of left discs.

This function updates the x,y position of a left disc on screen

The function also checks the y() position of a disc and increments missed\_disks if that y() position is above a certain value

The documentation for this class was generated from the following files:

- [left\\_disks.h](#)
- [left\\_disks.cpp](#)

## 4.7 leftbutton Class Reference

Inheritance diagram for leftbutton:

Collaboration diagram for leftbutton:

## Public Member Functions

- **leftbutton** (QObject \*parent=0)
- bool [checkColl](#) ()

*Function that checks collision between left button and objects (discs)*

### 4.7.1 Member Function Documentation

#### 4.7.1.1 checkColl()

```
bool leftbutton::checkColl ( )
```

Function that checks collision between left button and objects (discs)

#### Returns

bool: true if there was collision, false otherwise

The documentation for this class was generated from the following files:

- [leftbutton.h](#)
- [leftbutton.cpp](#)

## 4.8 loginPanel Class Reference

Inheritance diagram for loginPanel:

Collaboration diagram for loginPanel:

### Public Member Functions

- **loginPanel** (QWidget \*parent=nullptr)

The documentation for this class was generated from the following files:

- [loginpanel.h](#)
- [loginpanel.cpp](#)

## 4.9 lose\_screen Class Reference

Inheritance diagram for lose\_screen:

Collaboration diagram for lose\_screen:

### Public Member Functions

- `lose_screen` (`QWidget *parent=nullptr`)

### Public Attributes

- `QGridLayout * grid`
- `QLabel * lose`
- `QPushButton * return_to_login`

The documentation for this class was generated from the following files:

- [lose\\_screen.h](#)
- [lose\\_screen.cpp](#)

## 4.10 mainpanel Class Reference

Inheritance diagram for mainpanel:

Collaboration diagram for mainpanel:

### Public Member Functions

- **mainpanel** (`QWidget *parent=nullptr`)

The documentation for this class was generated from the following files:

- [mainpanel.h](#)
- [mainpanel.cpp](#)

## 4.11 mid\_disks Class Reference

Inheritance diagram for `mid_disks`:

Collaboration diagram for mid\_disks:

### Public Slots

- void [update](#) ()  
*Function that updates the position of mid discs.*

### Public Member Functions

- **mid\_disks** (QObject \*parent=0)

#### 4.11.1 Member Function Documentation

##### 4.11.1.1 update

```
void mid_disks::update ( ) [slot]
```

Function that updates the position of mid discs.

This function updates the x,y position of a mid disc on screen

The function also checks the y() position of a disc and increments missed\_disks if that y() position is above a certain value

The documentation for this class was generated from the following files:

- [mid\\_disks.h](#)
- [mid\\_disks.cpp](#)

## 4.12 midbutton Class Reference

Inheritance diagram for midbutton:

Collaboration diagram for midbutton:

### Public Member Functions

- **midbutton** (QObject \*parent=nullptr)
- bool [checkColl](#) ()

*Function that checks collision between mid button and objects (discs)*

#### 4.12.1 Member Function Documentation

## 4.12.1.1 checkColl()

```
bool midbutton::checkColl ( )
```

Function that checks collision between mid button and objects (discs)

**Returns**

bool: true if there was collision, false otherwise

The documentation for this class was generated from the following files:

- [midbutton.h](#)
- [midbutton.cpp](#)

## 4.13 question\_tab Class Reference

Inheritance diagram for question\_tab:

Collaboration diagram for question\_tab:

## Public Member Functions

- **question\_tab** (QWidget \*parent=nullptr)

The documentation for this class was generated from the following files:

- question\_tab.h
- question\_tab.cpp

## 4.14 right\_disks Class Reference

Inheritance diagram for right\_disks:

Collaboration diagram for right\_disks:

## Public Slots

- void **update** ()  
*Function that updates the position of right discs.*

## Public Member Functions

- **right\_disks** (QObject \*parent=0)

### 4.14.1 Member Function Documentation

#### 4.14.1.1 update

```
void right_disks::update ( ) [slot]
```

Function that updates the position of right discs.

This function updates the x,y position of a right disc on screen

The function also checks the y() position of a disc and increments missed\_disks if that y() position is above a certain value

The documentation for this class was generated from the following files:

- [right\\_disks.h](#)
- [right\\_disks.cpp](#)

## 4.15 rightbutton Class Reference

Inheritance diagram for rightbutton:

Collaboration diagram for rightbutton:

## Public Member Functions

- **rightbutton** (QObject \*parent=nullptr)
- bool [checkColl](#) ()

*Function that checks collision between right button and objects (discs)*

### 4.15.1 Member Function Documentation

#### 4.15.1.1 checkColl()

```
bool rightbutton::checkColl ( )
```

Function that checks collision between right button and objects (discs)

#### Returns

bool: true if there was collision, false otherwise

The documentation for this class was generated from the following files:

- [rightbutton.h](#)
- rightbutton.cpp

## 4.16 signup\_form Class Reference

Inheritance diagram for signup\_form:

Collaboration diagram for signup\_form:

### Public Slots

- void `check_pass_num_empty` ()  
*Function that checks if pass and phone number meet requirements.*
- void `back_from_signup` ()  
*Function that takes user back to main panel.*
- void `select_display_image` ()  
*Function that displays image selection.*
- static bool `isUnique` (QString curr\_name)  
*Function that checks if username is unique.*

### Public Member Functions

- **signup\_form** (QWidget \*parent=nullptr)

#### 4.16.1 Member Function Documentation

##### 4.16.1.1 back\_from\_signup

```
void signup_form::back_from_signup ( ) [slot]
```

Function that takes user back to main panel.

##### 4.16.1.2 check\_pass\_num\_empty

```
void signup_form::check_pass_num_empty ( ) [slot]
```

Function that checks if pass and phone number meet requirements.

#### 4.16.1.3 isUnique

```
bool signup_form::isUnique (
    QString curr_name ) [static], [slot]
```

Function that checks if username is unique.

#### 4.16.1.4 select\_display\_image

```
void signup_form::select_display_image ( ) [slot]
```

Function that displays image selection.

The documentation for this class was generated from the following files:

- [signup\\_form.h](#)
- [signup\\_form.cpp](#)

## 4.17 victory\_screen Class Reference

Inheritance diagram for victory\_screen:

Collaboration diagram for victory\_screen:

### Public Member Functions

- **victory\_screen** (QWidget \*parent=nullptr)

The documentation for this class was generated from the following files:

- [victory\\_screen.h](#)
- [victory\\_screen.cpp](#)

## 4.18 welcome\_screen Class Reference

Inheritance diagram for welcome\_screen:

Collaboration diagram for welcome\_screen:

### Public Slots

- void [back\\_to\\_main](#) ()  
*function to go back to previous panel*
- void [to\\_history\\_panel](#) ()  
*function to go to history panel*
- void [to\\_game\\_1](#) ()  
*function to launch game1*
- void [to\\_game\\_2](#) ()  
*function to launch [game2](#)*

## Public Member Functions

- **welcome\_screen** (QWidget \*parent=nullptr)
- void **getInfo** (QString User)

## Public Attributes

- QString **user**
- QGridLayout \* [welcome\\_panel](#)  
*main layout*
- QPushButton \* [game\\_1](#)  
*button to take user to game1*
- QPushButton \* [game\\_2](#)  
*button to take user to [game2](#)*
- QPushButton \* [back\\_to\\_main\\_page](#)  
*back button*
- QPushButton \* [history](#)  
*history button*
- QLabel \* [welcome\\_name](#)  
*display username*
- QLabel \* [welcome\\_date](#)  
*display today's date*

The documentation for this class was generated from the following files:

- [welcome\\_screen.h](#)
- [welcome\\_screen.cpp](#)

# File Documentation

## 5.1 battleship.cpp File Reference

battleship

```
#include "battleship.h"
#include <stdlib.h>
#include <time.h>
#include "question_tab.h"
#include <unordered_map>
#include <QtGlobal>
#include "victory_screen.h"
#include "lose_screen.h"
```

Include dependency graph for battleship.cpp:

## Macros

- **#define GET\_VARIABLE\_NAME(Variable) (#Variable)**

## Variables

- int **seconds** = 600
- int **correct** = 0
- int **incorrect** = 0
- QString **question\_path**
- QString **correct\_path**
- int **i** = 0
- int **j** = -1
- QList< int > **good\_ships** = QList<int>{10,12,13,30,31,32,33}
- QString **path\_explosion** = ":/game1/assets/pop.png"
- int **check** = 1
- unordered\_map< string, QString > **urlmap**
- unordered\_map< string, QString > **explodedmap**

### 5.1.1 Detailed Description

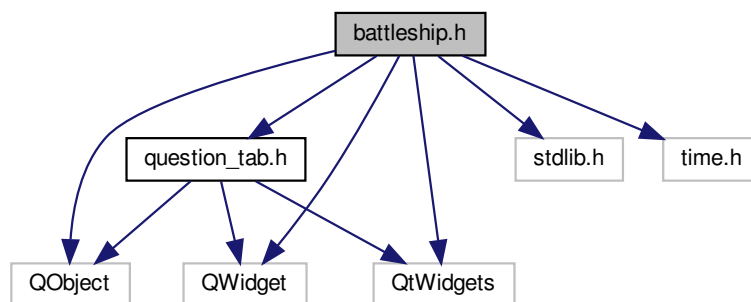

battleship

implementation of battleship class

## 5.2 battleship.h File Reference

battleship class

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
#include <stdlib.h>
#include <time.h>
#include "question_tab.h"
Include dependency graph for battleship.h:
```

This graph shows which files directly or indirectly include this file:

### Classes

- class [battleship](#)

### 5.2.1 Detailed Description

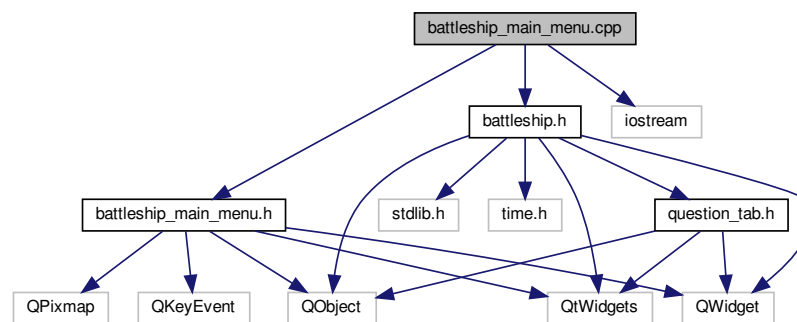

battleship class

class responsible for the battleship game

## 5.3 battleship\_main\_menu.cpp File Reference

battleship main menu

```
#include "battleship_main_menu.h"
#include "battleship.h"
#include <iostream>
Include dependency graph for battleship_main_menu.cpp:
```

### 5.3.1 Detailed Description

battleship main menu

implementation of battleship main menu class

## 5.4 battleship\_main\_menu.h File Reference

battleship main menu class

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
#include <QPixmap>
```

```
#include <QKeyEvent>
```

Include dependency graph for battleship\_main\_menu.h:

This graph shows which files directly or indirectly include this file:

## Classes

- class [Battleship\\_Main\\_Menu](#)

### 5.4.1 Detailed Description

battleship main menu class

class responsible for setting up the main menu of the battleship game

## 5.5 extern\_vars.h File Reference

extern\_vars class

```
#include <qgraphicsview.h>
#include "game2.h"
Include dependency graph for extern_vars.h:
```

This graph shows which files directly or indirectly include this file:

## Variables

- int `missed_disks`  
Counter for missed discs.
- int `total_score`  
Counter for total score.
- QString `ans`  
Choice of difficulty.

### 5.5.1 Detailed Description

`extern_vars` class

class that contains external global variables to be used across different files

### 5.5.2 Variable Documentation

### 5.5.2.1 missed\_disks

```
int missed_disks
```

Counter for missed discs.

Counter for missed discs.

### 5.5.2.2 total\_score

```
int total_score
```

Counter for total score.

Counter for total score.

## 5.6 game2.cpp File Reference

### game2

```
#include "game2.h"
#include "left_disks.h"
#include "mid_disks.h"
#include "right_disks.h"
#include "welcome_screen.h"
#include <QObject>
#include <QWidget>
#include <QDebug>
#include <QGraphicsPixmapItem>
#include <QTimer>
#include <QGraphicsPathItem>
#include "victory_screen.h"
#include "lose_screen.h"
#include "extern_vars.h"
#include <QMediaPlaylist>
```

Include dependency graph for game2.cpp:

## Variables

- int `counter_red` = 0  
*Counter for red discs.*
- int `counter_yellow` = 0  
*Counter for yellow discs.*
- int `counter_blue` = 0  
*Counter for blue discs.*
- int `total_score` = 0  
*Total score counter.*
- int `missed_disks` = 0  
*Missed discs counter.*
- QTimer \* `timer_left` = new QTimer()  
*Timer for spawning left discs on easy mode.*
- QTimer \* `timer_mid` = new QTimer()  
*Timer for spawning middle discs on easy mode.*
- QTimer \* `timer_right` = new QTimer()  
*Timer for spawning right discs on easy mode.*
- QTimer \* `timer_left_medium` = new QTimer()  
*Timer for spawning left discs on medium mode.*
- QTimer \* `timer_mid_medium` = new QTimer()  
*Timer for spawning middle discs on medium mode.*
- QTimer \* `timer_right_medium` = new QTimer()  
*Timer for spawning right discs on medium mode.*
- QTimer \* `timer_left_hard` = new QTimer()  
*Timer for spawning left discs on hard mode.*
- QTimer \* `timer_mid_hard` = new QTimer()  
*Timer for spawning middle discs on hard mode.*
- QTimer \* `timer_right_hard` = new QTimer()  
*Timer for spawning right discs on hard mode.*
- QMediaPlaylist \* `playlist` = new QMediaPlaylist()
- QMediaPlayer \* `music` = new QMediaPlayer()  
*For game music.*

### 5.6.1 Detailed Description

`game2`

implementation of `game2` class

### 5.6.2 Variable Documentation

#### 5.6.2.1 missed\_disks

```
int missed_disks = 0
```

Missed discs counter.

Counter for missed discs.

### 5.6.2.2 total\_score

```
int total_score = 0
```

Total score counter.

Counter for total score.

## 5.7 game2.h File Reference

[game2](#) class

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
#include <QGraphicsScene>
#include <QTimer>
#include "leftbutton.h"
#include "midbutton.h"
#include "rightbutton.h"
#include "qgraphicsview.h"
#include <QMediaPlayer>
Include dependency graph for game2.h:
```

This graph shows which files directly or indirectly include this file:

## Classes

- class [game2](#)

### 5.7.1 Detailed Description

[game2](#) class

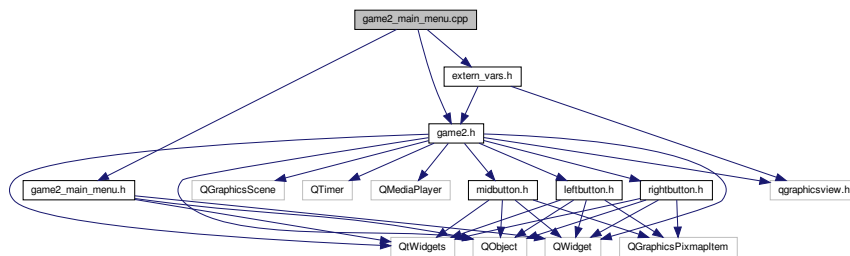

class responsible for the shooting discs game

## 5.8 game2\_main\_menu.cpp File Reference

[game2](#) main menu

```
#include "game2_main_menu.h"
#include "game2.h"
#include "extern_vars.h"
```

Include dependency graph for game2\_main\_menu.cpp:

### Variables

- QString [ans](#) = ""  
*Choice of difficulty.*

### 5.8.1 Detailed Description

[game2](#) main menu

implementation of [game2](#) main menu class

## 5.9 game2\_main\_menu.h File Reference

[game2](#) main meenu class

```
#include <QObject>
#include <QWidget>
```

```
#include <QtWidgets>
```

Include dependency graph for game2\_main\_menu.h:

This graph shows which files directly or indirectly include this file:

## Classes

- class [game2\\_main\\_menu](#)

### 5.9.1 Detailed Description

[game2](#) main meenu class

class responsible for the shooting discs game

## 5.10 historypanel.cpp File Reference

user game history implementation

```
#include "historypanel.h"
#include "welcome_screen.h"
Include dependency graph for historypanel.cpp:
```

### 5.10.1 Detailed Description

user game history implementation

## 5.11 historypanel.h File Reference

user game history

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
#include <QJsonObject>
Include dependency graph for historypanel.h:
```

### 5.12.1 Detailed Description

left discs

implementation of the [left\\_disks](#) class

## 5.13 left\_disks.h File Reference

left discs class

```
#include "game2.h"
#include <QObject>
#include <QWidget>
#include <QDebug>
#include <QGraphicsPixmapItem>
#include <QTimer>
#include <QGraphicsPathItem>
Include dependency graph for left_disks.h:
```

This graph shows which files directly or indirectly include this file:

### Classes

- class [left\\_disks](#)

### 5.13.1 Detailed Description

left discs class

class responsible for handling left discs

## 5.14 leftbutton.cpp File Reference

leftbutton

```
#include "leftbutton.h"
#include "left_disks.h"
#include "game2.h"
```

Include dependency graph for leftbutton.cpp:

### 5.14.1 Detailed Description

leftbutton

implementation of leftbutton class

## 5.15 leftbutton.h File Reference

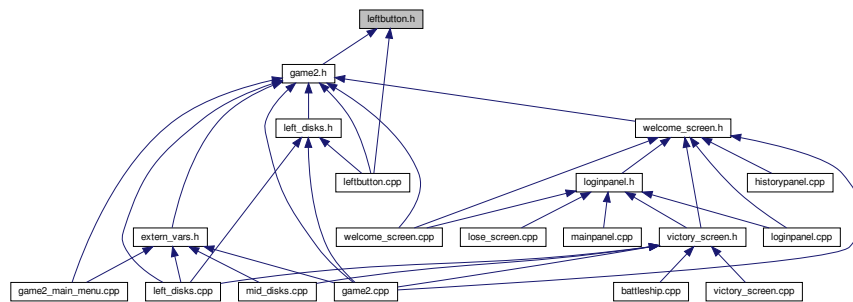

leftbutton class

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
#include <QGraphicsPixmapItem>
```

Include dependency graph for leftbutton.h:

This graph shows which files directly or indirectly include this file:

## Classes

- class `leftbutton`

### 5.15.1 Detailed Description

leftbutton class

class responsible for left button

## 5.16 loginpanel.cpp File Reference

## implementation of login menu

```
#include "loginpanel.h"
#include "mainpanel.h"
#include "welcome_screen.h"
#include "signup_form.h"
#include <iostream>
```

Include dependency graph for loginpanel.cpp:

### 5.16.1 Detailed Description

### implementation of login menu

## 5.17 loginpanel.h File Reference

loginpanel header class

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
#include <QJsonObject>
#include "welcome_screen.h"
Include dependency graph for loginpanel.h:
```

This graph shows which files directly or indirectly include this file:

### Classes

- class [loginPanel](#)

### 5.17.1 Detailed Description

loginpanel header class

for users to log in

## 5.21 mainpanel.h File Reference

mainpanel header class

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
```

Include dependency graph for mainpanel.h:

This graph shows which files directly or indirectly include this file:

### Classes

- class [mainpanel](#)

#### 5.21.1 Detailed Description

mainpanel header class

first interface

This graph shows which files directly or indirectly include this file:

## Classes

- class [mid\\_disks](#)

### 5.23.1 Detailed Description

mid discs class

class responsible for handling mid discs

## 5.24 midbutton.cpp File Reference

midbutton

```
#include "midbutton.h"
```

```
#include "mid_disks.h"
```

Include dependency graph for midbutton.cpp:

### 5.24.1 Detailed Description

midbutton

implementation of midbutton class

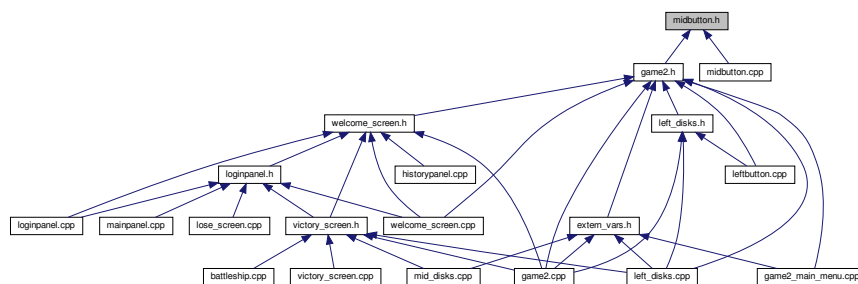

## 5.25 midbutton.h File Reference

midbutton class

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
#include <QGraphicsPixmapItem>
Include dependency graph for midbutton.h:
```

This graph shows which files directly or indirectly include this file:

### Classes

- class [midbutton](#)

### 5.25.1 Detailed Description

midbutton class

class responsible for mid button

## 5.26 right\_disks.h File Reference

right discs class

```
#include <QObject>
#include <QGraphicsPixmapItem>
#include <QTimer>
#include <QGraphicsPathItem>
Include dependency graph for right_disks.h:
```

This graph shows which files directly or indirectly include this file:

### Classes

- class [right\\_disks](#)

### 5.26.1 Detailed Description

right discs class

class responsible for handling right discs

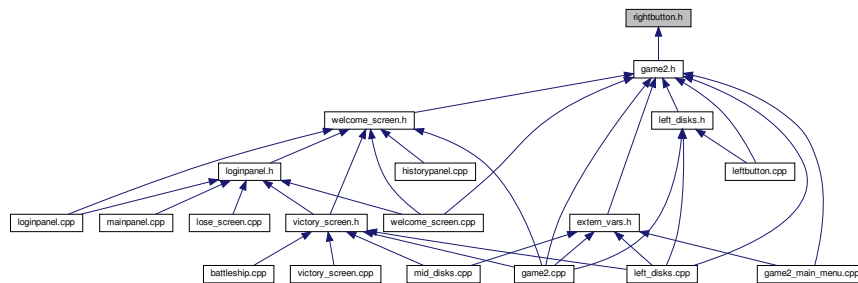

## 5.27 rightbutton.h File Reference

rightbutton class

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
#include <QGraphicsPixmapItem>
Include dependency graph for rightbutton.h:
```

This graph shows which files directly or indirectly include this file:

### Classes

- class [rightbutton](#)

### 5.27.1 Detailed Description

rightbutton class

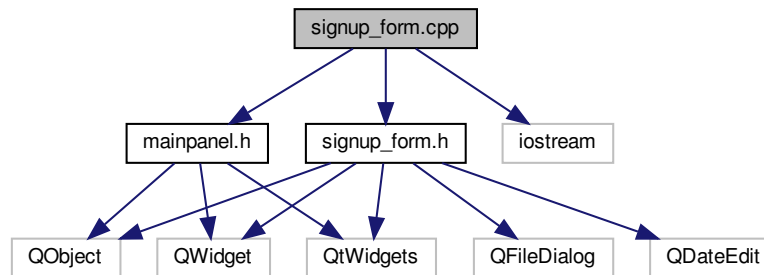

class responsible for right button

## 5.28 signup\_form.cpp File Reference

### signup\_form

```
#include "signup_form.h"
#include "mainpanel.h"
#include <iostream>
```

Include dependency graph for signup\_form.cpp:

### 5.28.1 Detailed Description

#### signup\_form

interface for registering new users

## 5.29 signup\_form.h File Reference

for registering new users

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
#include <QDateEdit>
#include <QFileDialog>
```

Include dependency graph for signup\_form.h:

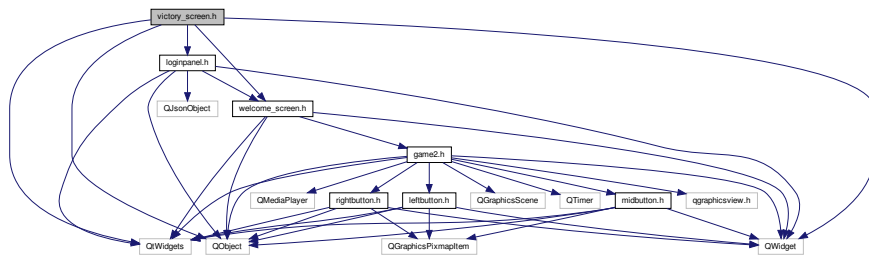

## 5.31 victory\_screen.h File Reference

victory screen class

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
#include "loginpanel.h"
#include "welcome_screen.h"
Include dependency graph for victory_screen.h:
```

This graph shows which files directly or indirectly include this file:

### Classes

- class [victory\\_screen](#)

#### 5.31.1 Detailed Description

victory screen class

class responsible for the victory screen at the end of either games

## 5.32 welcome\_screen.cpp File Reference

screen that shows when user logs in

```
#include "welcome_screen.h"
#include "mainpanel.h"
#include "loginpanel.h"
#include "QDate"
#include "historypanel.h"
#include "battleship_main_menu.h"
#include "game2.h"
#include "game2_main_menu.h"
```

Include dependency graph for welcome\_screen.cpp:

### 5.32.1 Detailed Description

screen that shows when user logs in

## 5.33 welcome\_screen.h File Reference

header file for [welcome\\_screen.cpp](#)

```
#include <QObject>
#include <QWidget>
#include <QtWidgets>
#include "game2.h"
```

Include dependency graph for welcome\_screen.h:

This graph shows which files directly or indirectly include this file:

## Classes

- class [welcome\\_screen](#)

### 5.33.1 Detailed Description

header file for [welcome\\_screen.cpp](#)
